Efficiency (HHV)	71.3%
Emissions	1.8 gm/hr.
Log Size (recommended)	16"
Log Size (max)	18"
Firebox Size	2.1 cu.ft.
Glass Size	122 sq.in.

### Weight

Super 27 LE	355 lb.
Super Classic LE	340 lb.

### SUPER 27 LE

Easy to light, easy to operate, and easy to maintain – the Super 27 LE is our most popular stove and offers industry-leading performance and reliability thanks to its exceptional catalytic-free design.

With superior burn technology, an incredible list of standard features, and a limited lifetime warranty, the Super 27 LE marks the gold standard for heating spaces up to 2000 square feet.

### SUPER CLASSIC LE

Enjoy all the outstanding features, high efficiency, and long burn time of the Super firebox beautifully clad in lustrous porcelain enamel. The Super Classic LE delivers Pacific Energy's proven heating performance with your choice of elegant porcelain enamel, door, leg and trivet finishes.

### FEATURES

- EPA 2020 Certified
- Reliable, Durable Catalytic-Free Technology
- NEW! Extended Burn Technology (EBT)
- Easy, one-touch operation
- Airwash Technology for clear, clean glass
- Multi-Port Combustion Air Injection System
- Inside and outside combustion air capable
- Floating firebox for extended stove life
- Metallic black finish (Super 27 LE)
- Heavy plate-steel top
- 304 Stainless Steel baffle, insulation cover, rails and flame shield
- Boost air for easy lighting
- Mobile home approved
- North-South loading

### PERFORMANCE OPTIONS

- Temperature-Actuated Variable-Speed Blower
- Easy-to-use ash disposal system (optional on Super 27 LE; included with Super Classic LE)

## FEATURED TECHNOLOGIES

### BAFFLE SYSTEM

Pacific Energy leads the industry in premium catalytic-free clean burn technology. Our unique high capacity baffle system preheats secondary combustion air for an extremely effective reburn. By burning the combustible elements in the air, we improve our stove's environmental performance while significantly reducing the amount of wood that is consumed.

### EBT2 EXTENDED BURN

EBT2 (the second generation of Extended Burn Technology) proudly available now on the Super 27 LE. The EBT2 is field proven to be highly effective at controlling the secondary burn system, extending burn times and reducing overall emissions.

### FLOATING FIREBOX

All fireboxes are subjected to wild extremes of temperatures. Solidly designed with steel brick support rails, our legendary floating system allows key parts to freely expand and contract to drastically reduce metal fatigue and add years of life to the entire appliance. The high capacity stainless steel baffle (part of the clean-burning secondary combustion system) and the flame shield (which protects the stove top from intense heat) are integral components of our legendary floating firebox system.

### KNIFE EDGE DOOR SEAL

Our formed and welded knife-edge opening creates a superior air tight seal to the door gasket while also strengthening the face of the stove. This is a more labor-intensive design, but our experience has proven this is the best way to manufacture a stove.

### SINGLE LEVER

It's never been simpler to achieve a clean, efficient flame. With Pacific Energy's air adjustment system, a single, easy-to-operate air control lever can regulate the entire burn.
